From the Chairman's desk

Chairman and Managing Director

Dear Shareholders,

It gives me great pleasure to share with you all that the past year has been an exemplary one and I would like to dwell on all the significant events that happened.

Building an integrated business model

In the last fiscal, we focused building an Integrated Business Model with presence across the value chain as we believe that it is becoming imperative in our nature of business to have consistency in timely supply and quality produce. Further, backward integration allows flexibility in shaping production plans based on customer needs and helps in higher turnaround of business orders.

Our existing processing capacity was insufficient to cater the growing demand that we were foreseeing at the start of the fiscal FY18 and our new plant was still sometime away. We therefore decided to increase the leased based processing capacity by another 3,000 MTPA starting from April 2017. This move has immensely helped us in serving more orders from our existing as well as new customers, thereby also safe guarding

our market share, especially in a high growth / demand year like the fiscal 2018.

In order to deliver higher quantities of Value Added products within the Ready-To-Cook category, we started a new Pre-processing unit at Tallevuru, East Godavari, strategically situated closer to the skilled workforce. On the farming side, we added almost 600 acres of farmland to a total of almost 1,800 acres currently which formed 18-20% of our total raw shrimp requirement in FY18. Lastly, we added one new hatchery which can now cater to almost 20% of our total seed requirement - in-house and external farms.

In the current fiscal, on one hand, our focus would be to capitalize on these backward integration efforts while on the other hand, we add new capacities and products as a forward integration measure. The new plant which is expected to be operational in the current fiscal, will have an installed processing capacity of 20,000 MTPA, of which, 5,000 MTPA would be towards a new category of products called the 'Ready-To-Eat'. With this, we aim to improve our product offering to our customers as well as profitability of our business.

We are mindful of the long-term business expansion requirements and have accordingly designed the new plant site in a way that it could accommodate brownfield expansion, if needed – which means incrementally less capex per unit of capacity.

We are mindful of the long term business expansion requirements and have accordingly designed the new plant site in a way that it could accommodate brownfield expansion, if needed – which means incrementally less capex per unit of capacity.

Listing – A key milestone on our journey

Your company began a new phase in its journey when it got listed on the NSE and BSE in September 2017. We raised a total amount of Rs 152.3 crs, of which Rs 25.4 crs was through offer for sale and the balance, Rs 126.9 crs, through fresh Issue of equity share capital. The fund raising was done primarily to fund the setting up of our new processing plant at G. Ragampeta, East Godavari (which we spoke about earlier) and should be completed in the current fiscal.

The listing of the company gave us an opportunity to be associated with some of the marquee investors. The company's share holding as of June 2018 consists of 72.49% with the promoter group, 5.4% with the mutual funds, 0.53% with Foreign Portfolio Investors and the balance with the Non-Institutional Investors.

As a way of rewarding our shareholders for the trust they reposed in us and for the good year that we have had last fiscal, the board has recommended a dividend of 20% (of face value), that is, Rs 2 per equity share as compared to 10% last year.

Industry trends & outlook

The last fiscal began on an exceptionally positive note, however, towards the second half, demand for processed shrimp tapered off because of extended winters and inventory pile up in some of our key markets. However, the supply of shrimp continued due to increased production by India and on-streaming of supply from some South East Asian countries. This scenario resulted in correction in shrimp prices by as much as 15-20% y-o-y. However, the demand-supply economics seemed to have played out and currently we are witnessing a gradual pick up in both consumption and prices.

We believe the following themes could play out in the Indian Aquaculture Industry in the medium term:

- India is continuing to gain global recognition for being able to maintain its quality even as its volumes increase, which will help increase its market share.
- The Industry is likely to witness some level of consolidation at the farming level.
- Disease management is the going to be a key area for Aquaculture industry – We are already seeing farmers looking to invest in technology aimed at higher productivity and better disease management.

The road ahead

Going forward, we expect demand to remain firm and our capacities to continue to be optimally utilized. We continually strive to reduce our costs through backward integration and

enhance our product offering to customers via value addition, thereby improving profitability of the business.

Our key focus areas in the current fiscal would be the following:

- Operationalise the upcoming processing plant
- Diversify Product Mix: Focus on increasing share of Value Added products within the Ready-To-Cook category; adding the Ready-To-Eat category of products to improve revenues and profitability
- Diversify Customers: Last fiscal we added higher business from the end-use Retail customers and aim to improve the mix further
- Diversify Markets: Foray into newer markets like China and the Middle East while continuing business with existing markets of the USA, UK and other European nations

Going forward, we expect demand to remain firm and our capacities to continue to be optimally utilized. We continually strive to reduce our costs through backward integration and enhance our product offering to customers via value addition, thereby improving profitability of the business.

Management discussion and analysis report

A. Economic environment

The financial year 2018 saw the World GDP grow by 3.8% in 2017 representing a marked improvement over 2016, which at 3.2% as per IMF estimates. The pick-up in growth in Emerging Markets & Developing Economies which recorded a growth of 4.8% in 2017 was supported by synchronous growth in the Advanced Economies which grew by 2.3% in 2017. The USA in particular saw growth of 2.3% in 2017 against 1.5% in 2016, led by robust recovery in Private Investment and expansion in consumer spending.

The USA is expected to continue this growth trajectory, albeit with more protectionist trade policies. This coupled with progressive tapering of quantitative easing in the EU and the tapering of interest rates in the USA could pose a challenge to the export driven emerging markets.

Domestically, based on the Survey of Professional Forecasters on Macroeconomic Indicators conducted by the RBI, Real gross domestic product (GDP) is likely to grow at 7.4% in 2018-19 – up from 6.7% in 2017-18 – and is expected to accelerate further i.e., by 20 basis points (bps) in 2019-20 on the back of support from private consumption and investment. (Reserve Bank of India, 2018)

a total harvest of 83.6 million tonnes in 2017. Capture fisheries productions remain stable at some 90.4 million tonnes. (FAO, 2018). The key producing nations include China, India, Indonesia and Vietnam.

Seafood consumption: The global per capita seafood consumption has been steadily increasing from under 10kg in 1960s to 20.3kg in 2016. (FAO, 2018). This has primarily been driven by rising income level, variety in product offering, richer protein content and stable supply through aquaculture. The key importing nations include USA, Japan, China and Spain.

Asia, and particularly China, remains the major driver of global seafood development on both the supply and demand side. (FAO, 2018)

In value terms, frozen shrimp exports were worth \$4.8 bn in Fiscal 2018, a growth of 30% y-o-y.

The key markets for Indian shrimp exports are USA, South East Asia and the EU, amongst others. India has been able to garner market share in the USA, on account of its sustained and stable supply of quality shrimps, from 8.4% in CY11 to 32.2% in CY17.

Fiscal year 2018 and outlook

The last fiscal started with high demand and better realisations, however, towards the second half, we saw a tapering off of demand due to extended winter and inventory pileup in the USA – a key market for Indian shrimp exports. Parallely, the supply of shrimps increased due to increased production by India and on-streaming of supply from some South East Asian countries. This resulted in a correction in prices of shrimp which started in H2Fiscal 2018. As of now, shrimp prices, on an average, might have corrected in the range of 15-20% year-on-year and are seeming to stabilise at current levels. While this may have an impact on realizations and revenues in the near term, we believe that such price corrections could lead to increased consumption of Shrimp and thereby boost volumes sold in the longer term.

house farming operations. We added one new Hatchery last year and increased our in-house farming by ~600 acres to ~1,800 acres currently.

Also, as a conscious effort towards favourably diversifying our revenue mix, we were successful in increasing our business from European Union last year. The share of EU in the overall revenue mix increased from ~18% in Fiscal 2017 to ~24% in Fiscal 2018, despite the strict quality norms and checks placed by EU on Indian processors. We aim to better the mix in the coming years. Our outlook for fiscal 2019 continues to remain positive given India's competitive positioning as Seafood exporter. Additionally, at the Company's level, the strategic initiative taken by the management will see us adding new capacities, new products like Ready-to-Eat category as well as foray into newer markets and thereby aid the growth in revenues and profitability.

D. Opportunities and threats

Opportunities

With the advent of increasing focus on moving to healthier foods and sourcing quality proteins, the developed economies are relying more heavily than ever on seafood as compared to other forms of meat. With our new production facility, we hope to be able to cater to this large opportunity.

Threats:

The aquaculture activity susceptible to the vagaries of nature natural calamities like floods and cyclones, during the culture season. As seen in other countries, the products that we offer are also susceptible to infections. Revenues may also get prone to volatility of international prices of shrimp, including duties and other levies. The industry has, however adopted and created best practices that are indicative of its development. Measures such as traceability and scientific pond management help reduce the impact of diseases. Hedging revenues also offers some protection against fluctuating forex rates.

E. Risks

Your Company's revenues are largely realised in foreign currency. Further, the nature of the business requires us to invest in working capital and therefore requires us to manage our liquidity positions carefully.

We have thus far managed to ensure that our relationships with our customers and suppliers are cordial and will continue working on that ethos.

Foreign exchange risk

We are exposed to exchange rate risk as a significant portion of our revenues are denominated in foreign currencies, while a large part of our expenses is incurred in Indian Rupees. Products that we export are paid for in foreign currency. Any appreciation in the value of the Rupee against U.S. dollar or other foreign currencies would decrease the realization of Rupee value of our products. The exchange rate between the Rupee and each of the U.S. dollar has changed substantially in recent years and may continue to fluctuate significantly in the future. While we hedge our positions, recent movements in currencies could mean that a certain portion of the risk could still impact our profitability.

Liquidity risk

Our approach to managing liquidity is to ensure, as far as possible, that we will have sufficient liquidity to meet our liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to our reputation. We have thus far managed to ensure that our relationships with our customers and suppliers are cordial and will continue working on that ethos.

F. Internal control systems

Your Company's independent and robust Internal Audit processes provide assurance on the adequacy and effectiveness of internal controls, compliance with operating systems, internal policies and regulatory requirements. The Company has in place an adequate system of internal control commensurate with its size and nature of its business. These have been designed to provide reasonable assurance that all assets are safeguarded and protected against loss from unauthorized use or disposition and that all transactions are authorized, recorded and reported correctly and the business operations are conducted as per the prescribed policies and procedures of the Company. The Audit committee and the management have, at periodic intervals, reviewed the adequacy of the internal control systems and suitable steps are taken to improve the same.

The Internal Controls are also essential for us to maintain the quality and consistency that our global customers expect of us.

G. Financial performance

“Annexure B” to the independent auditor’s report**Report on the Internal financial controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)**

We have audited the internal financial controls over financial reporting of **APEX FROZEN FOODS LIMITED** (“the Company”) as of 31st March, 2018 in conjunction with our audit of the standalone IND AS financial statements of the Company for the year ended as of that date.

Management’s responsibility for internal financial controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by The Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note issued by ICAI and the standards on Auditing prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the standalone IND AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our unqualified audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of internal financial controls over financial reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone IND AS financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of standalone IND AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the standalone IND AS financial statements.

Inherent Limitations of internal financial controls over financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, management's assessment that Company maintained effective internal control over financial reporting as of 31st March, 2018, is fairly stated, in all material respects, based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Management believes that the estimates used in the preparation of the standalone IND AS financial statements are prudent and reasonable.

Future results could differ due to changes in these estimates and the difference between the actual result and the estimates are recognized in the period in which the results are known / materialized.

This note provides a list of significant accounting policies adopted during the preparation of these financial statements which have been consistently applied to all the years presented, unless otherwise stated

2.2 Basis of preparation

i. Compliance with IND AS:

The Financial Statements comply in all material aspects with Indian Accounting Standards (IND AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

The Standalone IND AS financial statements are presented in Indian Rupees (INR) which is the functional and presentation currency of the company.

b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the date of transactions. iv. Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of returns and taxes (Goods and services tax).

The Company recognizes revenue upon transfer of significant risks and rewards of ownership of goods to the customer, when the amount of revenue can be reliably measured and it is probable that the future economic benefits will flow to the entity.

v. Income taxes

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses. Provision for current tax is made in accordance with the provisions of the Income-tax Act, 1961.

The current income tax expense is calculated on the basis on tax laws in force. The Management establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

Deferred Tax is provided in full on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the standalone IND AS financial statements. It is determined using tax rates that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred tax liability is settled.

Deferred Tax assets are recognized regarding all temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

The Deferred Tax Assets and Liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when deferred tax balance relates to the same taxation authority. Current Tax Asset and current tax liabilities are offset when the entity has a legally enforceable right to offset and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

The carrying amount of any component accounted for as a separate asset is derecognized when replaced.

On Transition to IND AS, the company has elected to continue with the carrying value of all its property, plant and equipment recognized as at 1st April, 2016 per the previous GAAP and use that carrying amount as the deemed cost of the property, plant and equipment. Under previous GAAP, deferred tax expense/ credit were recognized on timing differences between book profits and taxable profits. Under IND AS, deferred tax is required to be recognized on all temporary differences.

Accordingly, the management has recognized deferred tax liability of Rs. 634.50 Lakhs as at 31st March, 2017 (1st April, 2016 - deferred tax Liability of Rs. 701.36 Lakhs) on the above transition adjustments with a corresponding impact on retained earnings. Note: 2 - Re-measurements of post-employment benefit obligations

Under IND AS, remeasurements i.e. actuarial gains and losses and the return on plan assets, excluding amounts included in the net interest expense on the net defined benefit liability are recognized in other comprehensive income instead of profit or loss. Under the previous GAAP, these remeasurements were forming part of the profit or loss for the year. Note 3: Other comprehensive income

Under IND AS, all items of income and expense recognised in a period should be included in profit or loss for the period, unless a standard requires or permits otherwise. Items of income and expense that are not recognised in profit or loss but are shown in the Statement of Profit and Loss as 'Other comprehensive income' includes remeasurements of defined benefit plans. This concept did not exist under previous GAAP.

Note 4: Retained earnings

Note 5: Reclassifications

The previous GAAP figures have been reclassified to conform to IND AS presentation requirements.
